

CHIMERA

the secret within

A quiet tension

A special edition machine with a sophisticated composition of light, shadow, and depth. Like a city seen from above or a memory made of fragments, every surface tells a story. It's geometry with soul, crafted for those who see beauty in contrast, and depth in details. Pure structure, pure character.

Torre Espresso

black

Controlled Asymmetry

Wrapped in deep black, this machine features an insert that breaks the surface with architectural elegance. Its polished and satin metal elements, layered in relief, create a multifaceted glossy geometry.

 **TORRE**
MADE IN ITALY

CHIMERA

A geometric structure filled with a mosaic of squares with different dimensions, each element finished in either satin or polished metal, and positioned at subtly different heights. The result is a refined interplay of reflection and relief, tactile and balanced.
